## EXECUTIVE SUMMARY

This document contains the Management Support Services (MSS) Program for Fiscal Year 85. The document describes the relationship of the MSS Program to the goals of the US Army, the subcategories of contracted services, as defined in AR 5-14, and other elements relevant to the Program.

The FY 85 MSS Program data were collected from agencies and commands. The data were tabulated by computer and statistically analyzed. This document contains the summarized data and interpretation of the results.

The MSS Program data are presented in several dimensions of interest to Army commanders, managers and sponsors of contracted services. These include Total Army Goals, subcategories, status, sponsors, uses, resource levels, and budget appropriations. Salient results of the data assessment showed:

- The FY 85 MSS Program addresses all Army goals with most of the program addressing Management, Future Development, Materiel, and Readiness. The Training Goal, recently added to the seven goals, is not included in the analysis.
- All subcategories, as defined in Category C, AR 5-14, are addressed by the program. The largest is Program Management Support.
- Seventeen Army commands and agencies sponsor MSS contracts. AMC is the largest, with 71 percent of the contracts and 63 percent of the resources.
- Over half of the program are on-going contracts started in previous years, and slightly less than half are planned.
- Expected costs of new contracts vary widely, as indicated by planned funds for FY 85. Overall average is \$450K per contract. Contracts which do not have FY 85 dollar requirements are not included in this average.
- Funds are principally from OMA and RDT&E, although several other budget appropriations are represented.
- A majority of MSS contracts are expected to pay back benefits to the Army in the short term (0-2 years.)
- Out of 148 on-going MSS contracts, only 22 DTIC numbers were reported. The delinquency will be severely scrutinized in FY 85.

The data in this document present the variety of ways in which the FY 85 Management Support Services Program will be providing continuing assistance to Army commanders and managers for effective management of the planning, operational, research and development missions of the Army.

## SECTION 1

### INTRODUCTION

#### PURPOSE

This document contains the Management Support Services (MSS) Program for Fiscal Year 85. The purpose of the document is to describe the relationship of the Management Support Services Program to the Total Army Goals, subcategories of service, as defined in Appendix B, AR 5-14, and other elements relevant to the Program. The results of this assessment may be utilized to assist Army leaders and decision makers in long-range planning and managing their programs more effectively.

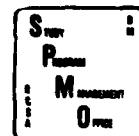

#### BACKGROUND

Contracts for Management Support Services are those services which are reflected in Paragraph C of both Schedule 10 of the annual command operating budget and the Congressional budget display. As defined in Appendix B, AR 5-14, Category C includes contracted services of a "white collar" nature, e.g., preparation of reports or documents, developing software or logistics support plans, or other similar tasks related to management and control of programs. Specifically excluded are those services acquired under commercial or industrial procedures (OMB Cir A-76), e.g., guard or mess attendant services, contracts for medical services, or services directly related to manufacture, repair, or maintenance of hardware. Also excluded are funds included in the Special Analysis for Computer Systems Programs and Exhibit PB-27 for Real Property Maintenance Activities.

In response to recent audit recommendations, the Study Program Management Office (SPMO) modified and clarified the definition of Management Support Services. The new definition states that those contracted services which support management and control of programs, as opposed to contracts which provide for program execution, should be included in Category C. Thus the stated examples and subcategories given in Appendix B, AR 5-14, are Category C efforts only if they are supporting management and control of programs. SPMO requested major Army agencies and commands to apply the definition rigorously so that Category C is not used as a catch-all for all service contracts.

#### METHOD OF INTERPRETATION

Data reported in the document were collected from major Army agencies and commands. A summary of the data and a description of the MSS Program are

---

---

---

---

---

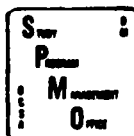

---

presented in this document. Tables are used to display the data, followed by an interpretation of the results. These results indicate the direction taken by the Army community in responding to HQDA policy on Performance Management Army (PMA). This provides a source of reference for readers who seek detailed information.

#### ORGANIZATION OF DOCUMENT

The document is divided in six sections, with this introductory section being the first. The next section contains an overall description of the FY 85 MSS Program. Data are presented and interpreted under seven discrete headings: Total Army Goals, subcategories, status, sponsors, uses, resource levels for FY 85 program, and appropriations. Frequency tables are used to present the data. Data for total resources are also provided in the tables and compared with the summary statistics.

A listing of contracted services is presented in the next four sections under the heading of title, descriptions, goal, or project identification number. Data pertaining to each contract are included in the listings. A glossary and a listing of oversight managers are provided in appendices. A list of symbols is located in the inside of the back cover.

## SECTION 2

### OVERALL DESCRIPTION OF FY 85 MANAGEMENT SUPPORT SERVICES

This section presents an overall description of Management Support Services for Fiscal Year 85. Data are presented in frequency tables, followed by an interpretation of salient results. The summary statistics are also compared with obligated resources for Fiscal Year 85.

The Management Support Service Program is described under seven separate headings, beginning with Total Army Goals. This is followed by subcategories, status, sponsors, uses, resource levels for FY 85 program, and appropriations.

#### TOTAL ARMY GOALS

On 7 December 1981, in a letter promulgated jointly by the Secretary of the Army and the Chief of Staff, United States Army, Total Army Goals were defined and explained. This year the Army added the goal "Training" to the original seven Total Goals. Achievement of all these goals has been determined to be the basis for assuring the continued successful accomplishment of the Army's traditional mission: to act as a deterrent to any attack upon US national interests and, if deterrence fails, to engage and defeat any enemy in any environment.

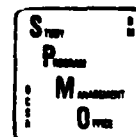

This letter was supplemented by approval of The Army Plan as a vehicle to infuse Performance Management Army (PMA) into Army planning guidance. PMA is a top down, participatory approach based on The Total Army Goals and results-oriented objectives linked to subordinate activities.

These goals will form the basis for development of HQDA, MACOM, and subordinate activity objectives. The Total Army Goals, including the Training Goal, are, as follows:

#### Readiness:

A Total Army prepared for the "three days of war": to deter the day before war; to fight and win on the day of war; and to terminate conflict in such a manner that on the day after war, the United States and its allies have an acceptable level of security.

Readiness reflects the capability of the Total Army, as perceived by its members, allies, and potential foes, to respond successfully to the full spectrum of warfare,

---

---

---

---

---

i.e., from terrorism to nuclear conflict. Training, maintenance, leadership, resource management, and close coordination with the other services and allies are the essential elements of readiness.

Human:

A Total Army composed of military and civilian professionals who loyally serve their nation in rewarding careers.

Attracting and retaining high quality Total Army members are essential to insure that service in the Army remains a way of life. This commitment to a professional is accomplished by striving to provide all members meaningful and satisfying duty, adequate living and working facilities, equitable compensation, professional development, advancement opportunity, and wholesome family life.

Leadership:

A Total Army whose leaders, at all levels, possess the highest ethical and professional standards committed to mission accomplishment and the well-being of subordinates.

Competent, effective leadership is the Total Army's key to success in training and success in the ultimate test: combat.

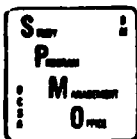

Training:

A Total Army trained to mobilized, deploy, fight, and win anywhere in the world.

Materiel:

A Total Army equipped and sustained to win any land battle.

The Total Army requires a technically superior, reliable, and powerful arsenal of effective weapons and equipment which can be rapidly transported, simply operated and easily maintained. Weapons and equipment must be developed through a cost-disciplined acquisition process that places a total system in the hands of trained personnel in the shortest possible time. Resupply procedures must be complete and sufficient for sustaining extended combat. Logistical support procedures must exist between the United States and its allies.

---

---

---

---

---

---

Future Development:

A Total Army sensitive to innovative approaches to accomplish its mission.

Strategic Deployment:

A Total Army organized, manned, and equipped so as to be capable of deploying, with transportation assistance, to any part of the globe to counter a wide spectrum of threats.

The global interests of the United States require a capability for global response. This entails support for the other services in achieving the necessary transportation assets and developing innovative approaches to overcoming transportation shortages.

Management:

A Total Army which efficiently and effectively uses the resources made available.

Management is the science of achieving maximum productivity from resources-- manpower, money, materiel, and time through appropriate management systems and techniques.

Summary and Analysis

- The goals, and the Total Army mission they support, mutually provide the vision and direction for the Army of the future. These goals are being used not only to guide the efforts of leaders and managers but also to evaluate the Army's progress in achieving proximate as well as remote outputs. By relating Army goals to the FY 85 Management Support Services, the goals become useful in yet another way: to provide a focus for planning.

- This portion of the section measures the extent to which the FY 85 Management Support Services address the Army goals. Since the Training Goal was added after the Army agencies and commands had submitted their Management Support Services Program for FY 85, the goal is not reflected in the summary data and therefore has been omitted from the analysis. The summary data are presented in Table 1, followed by an interpretation of the results.

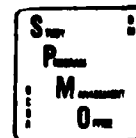

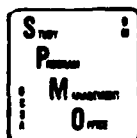

Table 1. Number (n) and percentage of contracted services and resources (r) by Army goal

Future Dev.	66	23	23
Strategic Dep.	4	1	1
Management	85	30	41
Total	285	100	100

• Nearly one-third of the planned and on-going management support service contracts contribute to the Management Goal. One out of five contracted efforts addresss the Readiness, Materiel, and Future Development Goals. Of the remaining contracts, 5 percent support Human, Leadership, and StrategicDeployment.

• In comparison, 41 percent of the FY 85 planned resources for management support services will be used in support of the Management Goal. Contracted services in support of the Readiness, Materiel, and Future Development account for over half of the remaining resources (14 percent, 20 percent, and 23 percent, respectively).

### Subcategories

There are eight distinct subcategories for contracts of management support services, as defined in Category C, AR 5-14. Contracts are categorized according to the subcategory which they support. Shortly after we requested data for the FY 85 Report, the Department of Defense removed "Systems Engineering" from Category C. Since the subcategory no longer applies to Category C, we have excluded the Systems Engineering subcategory from the data and description. The eight remaining subcategories are, as follows:

#### Program or project management support:

Contractual services, covering a wide variety of technical and managerial services, and containing more than one of the categories listed below, that directly support one or more specific program offices.

#### Policy review and development:

Repetitive services to investigate, evaluate, or assess existing managerial policies and organizations or to develop independently alternative procedures, organizations and policies.

#### Specification development:

Services to support provision of hardware or software specifications. Efforts supporting configuration management are included.

#### Technology sharing and utilization:

Services in support of examination of alternative applications and adaptations of existing or developmental technologies.

#### Logistic support services:

Services to support the integrated logistic support plan.

#### Technical data collection:

Services to support the collection or organization of data.

#### Public affairs and advertising:

Services to support conduct of advertising or public affairs.

---

---

---

---

---

Other professional and management services by contract:

Support services which have broad applicability and are not identifiable to any specific program.

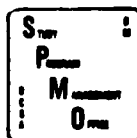

Summary and Analysis

• This portion of the section indicates the percentage and number of contracted services for FY 85 that are performing tasks for the Army which relate to the above subcategories of Category C. It also shows the percentage of resources which will be consumed by these various contracted services in each area. The summary data are presented in Table 2, followed by an interpretation of the results.

Table 2. Number (n) and percentage of contracted services and resources (r) by subcategory

Subcategory	n	%n	%r
Program Mgt. Support	132	46	59

Tech Data Collection	26	9	4
Public Affairs	3	1	10
Other Prof. & Mgt Serv.	51	18	13
Total	285	100	100

• Nearly half of the contracted services for FY 85 support Program or Project Management. Almost one-fourth of the remaining services contribute to Management Services which have broad applicability and are not identifiable to any specific program. Of the remaining efforts, 14 percent support Specification Development, with 22 percent contributing to the four other subcategories. As the percentages would suggest, most of the resources (59 percent) are also used to support Program Management.

### STATUS

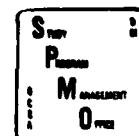

• Status is used to indicate whether, at the time of reporting, a contract had been started, i.e., on-going, or had yet to be started, i.e., planned, in the FY 85 Management Support Services Program.

• Table 3 shows the extent to which contracted services are planned or on-going for FY 85.

Table 3. Number (n) and percentage of contracted services and resources (r) by status

Status	n	%n	%r
Planned	137	48	40
On-going	148	52	60
Total	285	100	100

• Slightly over half of the contracted services are on-going and slightly less than half are planned for Fiscal Year 85. However, a much larger percentage of resources are consumed by on-going efforts as compared to planned (60 percent vs 40 percent).

## SPONSORS

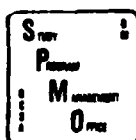

• Seventeen Army organizations are sponsoring management support services in the FY 85 program. They are: AMC, TRADOC, USAISC, ADEA, ARI, CAR, COA, DCSLOG, EUSA, HSC, OCSA, TJAG, TSG, USACMH, USAREC, USEUCOM, USMA.

• Table 4 shows the extent to which FY 85 management support services are being sponsored by Army organizations. Due to the small percentage of contracted efforts sponsored by ADEA, ARI, CAR, COA, DCSLOG, EUSA, HSC, OCSA, TJAG, TSG, USACMH, USAREC, USEUCOM, USMA, "other" is used in the table to refer to those particular Army organizations.

Table 4. Number (n) and percentage of contracted services and resources (r) by sponsor

Sponsor	n	%n	%r
AMC	201	71	63
TRADOC	39	14	11
USAISC	9	3	1
Other	36	12	25
Total	285	100	100

• At least three out of four contracted services (71 percent) are sponsored by AMC, which included AVSCOM, ERADCOM, CECOM, TACOM, and MICOM. Of the total contracted services, TRADOC sponsors 14 percent, with the remainder of 26 percent being sponsored by USAISC, ADEA, ARI, CAR, COA, DCSLOG, EUSA, HSC, OCSA, TJAG, TSG, USACMH, USAREC, USEUCOM, and USMA. The distribution of resources among the Army organizations is relatively comparable to the percentage of planned and on-going contracted services for FY 85.

---

---

---

---

## USE

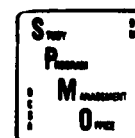

● Use stipulates the anticipated end use of a contracted service. Army agencies were asked to indicate an anticipated end use for each contracted service reported. Sponsors were given five areas from which to make their selection. These are, as follows: (a) to provide new or improved analytical tools, techniques, games, models, or simulations; (b) to provide a rationale or explained options for enlightened decision alternatives; (c) to increase or improve operations, organizations, or procedures; (d) to advance knowledge or state-of-the-art; and, (e) to validate current plans, operations, or procedures.

- Table 5 indicates the extent to which contracted services are used.

Table 5. Number (n) and percentage of contracted services and resources (r) by use

Use	n	%n	%r
Improved methods	39	14	12
Provided decision alternatives	50	18	19
Improved operations	118	41	35
Advanced knowledge	46	16	12
Validated plans	32	11	22
Total	285	100	100

● Nearly half of the contracted services have an anticipated end use of improving operations, organizations, or procedures and almost one-fifth of providing options for decision alternatives (41 percent and 18 percent, respectively). The remaining 41 percent are fairly evenly distributed among the other uses. To meet the anticipated results, a little over one-third of the resources will be used for improving operations. Nearly one-fourth of the resources will also be utilized for validating plans, operations, or procedures. Of the remainder, the distribution of resources is comparable to the distribution of contracted services for each anticipated result.

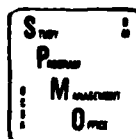

RESOURCE LEVELS FOR FY 85 PROGRAM

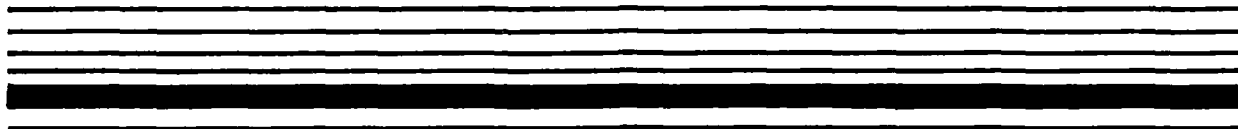

• Table 6 shows the extent to which contracted services have high, medium, or low resource requirements for FY 85. Low indicates \$200,000 and below, medium \$200,001 - \$500,000, and high above \$500,000. "None" refers to contracted services continuing from the previous fiscal year(s) which do not have FY 85 dollar requirements. It is important to note that the contractual resource level bears no relationship to the level of importance or priority given to a particular project.

Table 6. Number (n) and percentage of contracted services by resource (r) level

Resource Level	n	%n
Low	77	28
Medium	35	12
High	36	12
None	137	48
Total	285	100

• Twenty-eight percent of the contracted services have low resource requirements for FY 85 dollars. Of the remainder, 12 percent have medium resource requirements and 12 percent have high. Of the total program, nearly half of the contracted services do not have FY 85 dollar requirements.

#### APPROPRIATIONS

- Appropriation refers to the source of funding for contracted services.
- Table 7 shows the extent to which contracted services are funded by OMA, RDT&E, and other sources of funding.

Table 7. Number (n) and percentage of contracted services and resources (r) by appropriation

Appropriation	n	%n	%r
OMA	127	45	42
RDT&E	136	48	35
Other	22	7	23
Total	285	100	100

- Practically all of the planned and on-going contracted services for FY 85 are funded by OMA and RDT&E (45 percent and 48 percent, respectively). The large percentage of contracted services using OMA funds reflect the Army's continuing need for management and logistics service support, while an almost equally large proportion of contracted services being funded by RDT&E reflect the need for support of the Army's research and materiel development activities.

### SECTION 3

#### STATISTICAL LISTING OF FY 85 MANAGEMENT SUPPORT SERVICES BY TITLE

This section provides a statistical listing of all contracted services for FY 85. The listing is alphabetized by title.

A description of the headers and symbols used in the listing can be found in the inside of the back cover and the last page of this document. A glossary of terms is located in Appendix A.
